

# **PAIN & BEHAVIOR**

Join us for a virtual CE with **Desiree Beauchamp, MA CCB CDBC FDM**

**August 27th from 9AM-11AM MST**

This course is an exploration of the manifestations of pain in dogs as seen through the lens of a behavioral consulting practice. We will discuss how pain impacts behavior, ways that behavior consultants may assess or identify pain to refer back to the veterinarian, navigating conversations with clients. From there, we will take a look at few case studies where pain was a major factor in the behavioral intervention plan.

**This CE is \$30 and is 2 RACE  
approved credits.**
