

BEL-REA Virtual CE

with Denise Rollings

AAS, CVT, VTS (Dentistry)

Exploring Dental Health in Small Animals: Feline Dentistry, Malocclusions, and Dental Radiography

This CE will review the top oral pathology seen in cats. In the webinar, we will review the descriptions of tooth resorption, stomatitis, squamous cell carcinoma, and periodontal disease in felines. This lecture will focus on the details of how stomatitis/mucositis appears, the stages and types of tooth resorption, how to recognize periodontal disease, and what the proper potential treatment options are. The classes of malocclusions will be discussed in detail so veterinary staff members will be able to correctly identify the problem. Learn what the potential proper treatment options are for the different classes of malocclusions

FEB 6TH, 6 PM - 9PM MST
