VET TECH CONSULTS: HELPING CLIENTS WITH DIET CHOICES

2 RACE APPROVED CE CREDITS

This Webinar CE is \$30. Current Bel-Rea students, please contact Angela Taibo for a discount.

Proper nutritional management is one of the most important factors in managing health and disease in pets. As clients become more aware of the importance of nutrition for their own health, they will expect this same higher standard of nutritional care for their pets. The veterinary healthcare team should be the preferred expert source of the best nutritional information for pets. Veterinary teams that understand and promote clinical nutrition and demonstrate in-clinic behaviors consistent with this conviction will benefit their patients, their clients, and their practices. Proper nutritional management is one of the most important factors in maximizing health, performance, and longevity in addition to managing disease conditions.
